

## Proceq Ground Penetrating Radars

# **GP8100**

Highly productive portable concrete GPR array, enabling quick object detection and superior data collection

#### **Productivity**

Boost scanning efficiency with 25cm effective scan width and 80cm penetration depth, one scan is equivalent to 6 classical line scans

#### **Visualization**

Detecting objects of all sizes and marking on concrete surfaces has never been so easy and fast with the superline scan view

#### **Density**

The high scan rate of 1'200 scans/s enables a very dense GPR data collection in only one superline scan, which can be visualized in 6 classical line scans
