

Application

trichloroethylene with advanced cleaning power. It is non-flammable, does not corrode metals easily, and is one example of solvents that offers the highest degreasing performance of chlorinated organic solvents. Two grades are available: AL (alkali type) and NE (neutral type). It can also be used as a substitute for brominated solvents for which regulations and controls are expected to tighten.

Technical Specifications :

Description	Weight
Trichloroethylene	290 kg / drum
Trichloroethylene	28 kg / net weight
