

- Multi-functional strength tester suitable for testing the concrete (C10~C80) strength and External wall tapestry brick bonding strength on site, and also suitable for testing the other pull strength. It adopts the Post-install pull-out test method for testing the concrete strength through testing the anchoring parts pull-out strength to calculate the concrete strength. Tapestry brick bonding strength is tested through three-point force of reaction to tapestry brick.

### STANDARD

EN 1542, EN 1348, EN 1015-12

### 2. Specification

Capacity	40KN
Tripod inner diameter	120MM
Accuracy	± 1% F.S
Error	
Weight	
Test block	40*40*8mm 3pcs
Pull rod	1set
Concrete anchor	1set
Sander	1set
Carry case	1pcs

Seiko quality

ODM

Long-lasting

Dust proof

Regularly test
